

Collaboration, Mentorship & Education for Military Nurse Scientists

TRISERVICE NURSING RESEARCH PROGRAM

ABOUT

TSNRP funds evidence-based solutions to complex healthcare problems and strengthens readiness for American warfighters and their families.

It is the only program to fund Army, Navy, and Air Force nurses who improve clinical outcomes via scientific research and Evidence-Based Practice (EBP) projects relevant for military operations.

BENEFITS FOR MILITARY NURSES

All active and retired military nurses, and nursing students who plan to enter the military, are invited to join. You'll enjoy:

\$3M+

in grants to apply for

100+

nursing contact hours

7

leading edge courses

Networking
in-person and online across services

Mentors & Contacts
to advance your military career

Opportunities
to grow Leadership and research skills

Resources
to develop Evidence-Based Practice

Connections, Collaboration & Mentoring

Research Interest Groups (RIGs) are supportive "think tanks" for nursing innovation. Join to share ideas, find or be a mentor, participate in research, and learn from colleagues.

- Anesthesia
- Biobehavioral Health
- Expeditionary Care
- Health System/Informatics
- Military Family
- Military Women's Health

YOU'RE INVITED!

BIOBEHAVIORAL HEALTH Research Interest Group

ABOUT

BHRIG members support military researchers with methods, education, and mentoring to advance all scientific interests under the biobehavioral health umbrella.

This community:

- Integrates biological, behavioral, psychological socio-cultural, and spiritual sciences to generate innovative research and Evidence-Based Practice (EBP) to enhance human performance and readiness of service members across the deployment cycle.
- Engages and maintains collaborative partnerships with fellow RIGs, national and international organizations, policymakers, universities, civilian healthcare systems, the military healthcare system, and military leaders at the strategic, operational, and tactical levels.
- Identifies gaps in biobehavioral health research and clinical practice, and supports doctorally prepared nurses with research funding; and conducts meaningful research studies and EBP projects.
- Mentors and develops triservice scholars to conduct research and EBP projects to grow the next generation of nurse leaders in research and clinical inquiry.
