

Collaboration, Mentorship & Education for Military Nurse Scientists

TRISERVICE NURSING RESEARCH PROGRAM

ABOUT

TSNRP funds evidence-based solutions to complex healthcare problems and strengthens readiness for American warfighters and their families.

It is the only program to fund Army, Navy, and Air Force nurses who improve clinical outcomes via scientific research and Evidence-Based Practice (EBP) projects relevant for military operations.

BENEFITS FOR MILITARY NURSES

All active and retired military nurses, and nursing students who plan to enter the military, are invited to join. You'll enjoy:

\$3M+

in grants to apply for

100+

nursing contact hours

7

leading edge courses

Networking
in-person and online across services

Mentors & Contacts
to advance your military career

Opportunities
to grow Leadership and research skills

Resources
to develop Evidence-Based Practice

Connections, Collaboration & Mentoring

Research Interest Groups (RIGs) are supportive "think tanks" for nursing innovation. Join to share ideas, find or be a mentor, participate in research, and learn from colleagues.

- Anesthesia
- Biobehavioral Health
- Expeditionary Care
- Health System/Informatics
- Military Family
- Military Women's Health

YOU'RE INVITED!

EXPEDITIONARY CARE

Research Interest Group

ABOUT

EXRIG members innovate, improve, and modernize mission-critical nursing resources and proficiencies related to combat care during MDO. Their interests range from points of injury to hospital care, and handoffs to IO access to blood transfusion, and decreasing stress and pain during transport.

This community:

- Disseminates best practices and leading-edge research on en route care and nursing in austere military environments including prolonged pre-hospital care in the field or at sea.
- Serves as an educational and professional resource, network, and support platform to ensure highly adaptive and effective care of the warfighter in the future operating environment.
- Promotes research and advances translation of knowledges into Evidence-Based Practice (EBP) to support highly reliable care across all echelons.
- Transitions scientific findings to the operational environment to equip the joint nursing force to execute optimized patient care worldwide.
